Professional Experience

TBO.com

Analytics Manager

January 2023 – Present

Gurugram, India

- Lead enterprise analytics and business intelligence initiatives spanning ERP, Finance, Revenue, Reporting, and Automation, translating complex business and financial data into governed, scalable decision-support capabilities.
- Direct analytics across Microsoft Dynamics 365 Finance & Operations, Azure Synapse, and AWS, supporting financial reporting, revenue analytics, reconciliation, and management information for enterprise-wide decision-making.
- Manage analytics workflows processing 200M+ records per month across ERP and operational sources, ensuring scalability, reliability, reconciliation, and data quality at enterprise scale.
- Established a single source of truth across 15+ data sources, standardizing critical analytics and reporting use cases organization-wide.
- Led automation of 15+ recurring finance and reporting workflows, cutting manual processing effort by approximately 80 percent and reducing month-end reconciliation from 3 days to under 4 hours.
- Own Finance and ERP analytics covering AP/AR ageing, supplier and customer balances, General Ledger, revenue analytics, PLB ageing, reconciliation, and financial exposure reporting.
- Deliver executive dashboards and management reporting leveraged by 100+ stakeholders across Finance, Revenue, Operations, and senior business leadership.
- Drive data quality, validation, and reconciliation controls across ERP transaction sources; coordinate third-party partners on solution planning, delivery governance, and production stability.
- Mentor and upskill analytics team members in SQL, Power BI, data validation, reporting standards, and business domain expertise.

OYO

Associate Manager – Business Analytics

April 2022 – January 2023

Gurugram, India

- Led business analytics and management reporting initiatives supporting operational and commercial decision-making across the organization.
- Translated business requirements into KPI frameworks, analytical models, and management reporting using SQL, Excel, and Power BI.
- Partnered with business stakeholders to define performance metrics, reporting logic, and analytical requirements.
- Strengthened data validation, reconciliation, and reporting consistency across operational datasets.

- Drove automation and standardization of recurring analytical and management reporting processes.

DEN Networks Limited

Senior Officer – Sales Operations & Business Analytics

July 2017 – March 2022

New Delhi, India

- Managed business analytics, sales operations reporting, and performance analysis across large-scale operational datasets.
- Developed management dashboards, KPI frameworks, and analytical models supporting sales performance and business reviews.
- Automated recurring reporting processes using SQL, Excel, and VBA, reducing dependency on manual reporting.
- Delivered revenue, sales, and operational analytics to identify performance trends, exceptions, and business opportunities.
- Partnered with business stakeholders to define reporting requirements and standardize performance KPIs.
- Established data validation, reconciliation, and reporting controls across operational systems.
- Delivered management-level performance analysis and business intelligence reporting for senior stakeholders.

Macro Commerce Private Limited

Senior Executive – FP&A (Analytics Role)

August 2016 – July 2017

Okhla, India

- Supported financial planning, management reporting, and business performance analytics, including variance analysis for management review.
- Performed data reconciliation and validation across financial and operational datasets, automating recurring Excel-based reporting.

HomeShop18

Executive – Business Reporting and MIS Operations

September 2014 – August 2016

Noida, India

- Developed recurring reports and analytical models using Excel and SQL to support management reporting and performance monitoring.
- Analyzed sales, operational, and customer data to identify trends, performance gaps, and reconciliation requirements.

DTDC Courier & Cargo Ltd

Senior Executive – Client Operations & Reporting

January 2012 – September 2014

Greater Delhi Area

- Supported operational analytics, reporting, and performance monitoring across logistics and business operations using Excel and SQL.
- Performed data validation, reconciliation, and reporting activities, delivering structured analytical insights to management.
